

## Javascript Exercises

1. Use Javascript to modify Google's homepage as follows:
  - a. Change the background color to pink
  - b. Change the "Google Search" button to say "Get Results" and change its width to 100%
  - c. Hide the "I'm Feeling Lucky" button.
2. Output all Academic Departments at Eastern:  
<http://www.easternct.edu/academics/academic-departments/>

Note: The departments are listed in an unordered list with class name of "cleanList". If you get this <ul> element, then you can look at its *children* to get the list items.

3. Most webpages on Eastern's site have a blue header at the top of the page with links for "Request Info", "Visit", etc. Modify the header from the Academic Departments page so that it has a fixed position at the very top of the page, so that it remains at the top of the page when a user scrolls down.
4. Information about Computer Science faculty members can be found at  
<http://www.easternct.edu/computerscience/faculty/>

Output the names of all full-time faculty members. Hint: What element and class is used for each full-time faculty member's name?
